

**ELEVATION BULL NOSE FRONT BUMPER
2007-13 CHEVY SILVERADO 1500**

PARTS LIST:

1	Elevation Bull Nose Front Bumper Assembly	12	12-1.75mm x 50mm Hex Bolts
1	Winch Tray Assembly	38	12mm x 32mm OD x 3mm Flat Washers
1	Driver/left Frame Mounting Bracket	20	12mm Nylon Lock Nuts
1	Passenger/right Frame Mounting Bracket	2	8-1.25mm x 25mm Hex Bolts
1	Winch Access Cover	2	8-1.25mm x 16mm Hex Bolt
1	Driver/left LED light bracket	6	8mm x 24mm x 2mm Flat Washer
1	Passenger/right LED light bracket	4	8mm Lock Washers
2	Plastic Plugs for License Plate	2	8mm Hex Nuts
2	12mm Bolt Plates	5	6mm Combo Bolts (winch access cover)
6	12-1.75mm x 140mm Hex Bolts	1	4mm Wrench (combo bolts)

PROCEDURE: REMOVE CONTENTS FROM BOX. VERIFY ALL PARTS ARE PRESENT. READ INSTRUCTIONS CAREFULLY BEFORE STARTING INSTALLATION. BUMPER IS HEAVY, ASSISTANCE IS HIGHLY RECOMMENDED TO AVOID POSSIBLE INJURY OR DAMAGE TO THE VEHICLE.

1. Remove the license plate and bracket. On models with factory fog lights, unplug both lights and harness leading to the bumper, **(Figures 1 & 2)**. Move all wiring harnesses away from bumper.
2. Remove the outer bumper supports on each side of the frame, leading from the frame to the outer ends of the bumper, **(Figures 2 & 15)**.
3. Place blocks or jack stands under the front bumper to support it during mounting bolt removal. Once the bumper has been safely supported, remove the factory hex nuts and double bolt plate attaching the inner bumper bracket to the ends of the frame, **(Figure 3)**. **WARNING!** Assistance is required to hold the bumper in place during bolt removal to prevent the bumper from falling. Slide the bumper assembly off of the frame.
4. Remove both tow hooks from the ends of the frame, **(Figures 4 & 5)**.
5. Select the driver/left Frame Mounting Bracket. Attach the Bracket to the frame with (1) 12mm x 140mm Hex Bolt, (2) 12mm Flat Washers and (1) 12mm Nylon Lock Nut, **(Figure 6)**. It may be easier to attach the Bracket at the top mounting hole first before inserting the remaining long hex bolts.
6. Next, insert (1) 12mm Bolt Plate into the end of the Bracket and out through the hole to the inside wall of the frame, **(Figure 6)**. Secure the Bracket to the Bolt Plate with (1) 12mm Flat Washer and (1) 12mm Nylon Lock Nut. Leave hardware loose at this time.
7. Repeat **Step 5** to insert (2) 12mm x 140 Hex Bolts, (4) 12mm Flat Washers and (2) 12mm Nylon Lock Nuts through the (2) remaining mounting holes in the driver/left Mounting Bracket, **(Figures 6—9)**.

**ELEVATION BULL NOSE FRONT BUMPER
2007-13 CHEVY SILVERADO 1500**

8. Repeat **Steps 5—7** to attach the passenger/right Frame Mounting Bracket to the end of the frame.
NOTE: On the passenger side, the 12mm Bolt Plate will install through the outside wall of the frame.
9. **Optional Winch Tray and Winch installation, (winch sold separately):**
 - a. Select the Winch Tray. With assistance, slide the Winch Tray between the Frame Brackets. Attach the Winch Tray to the Frame Brackets with (6) 12mm x 50mm Hex Bolts, (12) 12mm Flat Washers and (6) 12mm Nylon Lock Nuts, (**Figures 10 & 11**). Snug but do not fully tighten all hardware.
IMPORTANT: LED bar style light cannot be installed with Winch Tray. If installation of LED bar style light is desired, do not install the Winch Tray and skip to Step 10.
 - b. If installing winch, follow manufacturer's instructions to attach the winch to the Winch Tray. Winch must be installed before Bumper is placed in position against Brackets. Attach winch cable guide, (not included), to Bumper assembly. Follow manufacturer's instructions to properly wire the winch to the electrical system.
10. **Optional Center LED light installation (sold separately). NOTE:** Light must be installed before Bumper Assembly is attached to the Frame Brackets. **IMPORTANT: Winch Tray cannot be installed with LED bar style light assembly.**
 - a. Select the L/R "L" Brackets, (**Figure 12**). **NOTE:** "L" Brackets are offset for universal fitment for most LED bar style lights. Attach the LED light assembly to the "L" Brackets with the included (2) 8mm x 16mm Hex Bolts, (2) 8mm Lock Washers and (2) 8mm Flat Washers. Do not fully tighten hardware at this time. **NOTE:** "L" Brackets may require modification for hardware larger than 8mm or use brackets supplied with light if possible.
 - b. Attach the light and Brackets to the top of the (2) tabs on the back of the Bumper with the included 8mm x 25mm Hex Bolts, (4) 8mm Flat Washers, (2) 8mm Lock Washers and (2) 8mm Hex Nuts, (**Figure 12**). Adjust light position and tighten hardware.
 - c. Follow light manufacturer's instructions to wire the light once Bumper has been fully installed.
11. With assistance, carefully position the Bumper Assembly up to the Mounting Brackets. Temporarily support the weight of the Bumper. **WARNING:** To avoid possible injury or damage to the vehicle, do not proceed until the bumper is fully and safely supported. Models with winch or LED light, check for clearance before fully installing Bumper assembly.
12. Line up the (3) holes in the driver/left side of the Bumper with the (3) holes in the Frame Mounting Bracket, (**Figures 13 & 14**). Attach the mounting plate on the back of the Bumper to the Bracket with the included (3) 12mm x 50mm Hex Bolts, (6) 12mm Flat Washers and (3) 12mm Nylon Lock Nuts. Do not fully tighten hardware at this time. Repeat this Step to attach the passenger/right side of the Bumper to the Mounting Bracket.
13. Level and adjust the bumper and fully tighten all 12mm hardware to 65-70ft-lbs.
14. **Models with fog lights:**
 - a. Remove the driver/left light from the original bumper, (**Figure 15**).
 - b. Remove the (3) screws from the mounting posts on the light.
 - c. Slide the light into place against the mounting tabs on the Bumper.
 - d. Reuse the (3) screws to attach the light to the mounting tabs, (**Figure 16**). **IMPORTANT:** Tabs may become misaligned in transit. Carefully bend the tabs if needed to properly line up with the mounting points on the back of the fog light.
 - e. Repeat previous Steps to install the passenger/right fog light.
15. Reattach the factory wiring harness to both lights if equipped.
16. Use the included (2) push-in Plastic Nuts to attach the front license plate, (if required), to the (2) holes in the front Bumper, (**Figure 17**).
17. Do periodic inspections to the installation to make sure that all hardware is secure and tight.

To protect your investment, wax this product after installing. Regular waxing is recommended to add a protective layer over the finish. Do not use any type of polish or wax that may contain abrasives that could damage the finish. Mild soap may be used to clean the Heavy Duty Front Bumper assembly.
